

COLLEGE TECH PREP

Automotive Technologies

Students develop practical experience in basic diagnostic and troubleshooting skills while becoming proficient in repair and maintenance of a car's mechanical and electrical systems. Students may be required to purchase a tool kit to be used during the course and upon entry into the job market. Completers are now working as technicians at car dealerships, service centers and automotive specialty shops. Five college credits are available at Cuyahoga Community College and six credits at Stark State College of Technology.
