

## COLLEGE TECH PREP

# Cosmetology

Upon completion of this two-year program, students are prepared to take the NIC National Cosmetology Exam, recognized by most states and several foreign countries. Both Cuyahoga Falls and Roosevelt students have an exemplary record in passing the exam. Students qualify for immediate employment and can perform professional grooming services related to the care of hair, skin and nails. Instructors and students are kept up to date in this rapidly changing profession by attending shows and conferences, hosting guest artists and participating in competitions. Internships are available in “high end” salons. Thirty college credits are available at The University of Akron, Summit College.
