

COLLEGE TECH PREP Interactive Media/Digital Design

Students interested in marketing, graphic design, advertising, communications, public relations or photography use the latest in new technology and software to gain hands-on experience in these fields. Throughout this one-year program, students utilize projects and experience-based learning activities that result in a professional portfolio. Team-taught by a marketing teacher and an art teacher, the real work of business and design comes to life. In addition, students participate in worksite learning while working in a local business. Three college credits are available at Cuyahoga Community College.
